

AED Mentor Program

This new program is designed to aid underclassmen in their journey to a pre-health profession by pairing them with an upperclassman who will cover several important academic topics throughout the year.

What is expected of you as a mentor?

- A long term commitment to the underclassman you are assigned. (Fall and Spring Semester)
- A solid understanding of what is expected of pre-med students in regards to academics, extra-curricular activities, and applying to medical school.
- Monthly meetings with your assigned underclassman to cover important pre-health topics.
- Keeping log of the hours you volunteer your services as a well as brief progress reports.

What are the benefits of becoming a mentor?

- Mentors will be awarded 3 AED points per semester for proper completion of the mentor program.
- Successful completion of this project will give you the benefits associated with adding this to a graduate school application/resume as certified by AED.
- The gratification of knowing you helped a future Seminole healthcare provider!

Overview of Topics:

1. Medical School Prerequisites
2. Undergraduate Research
